

## Electronic controllers

---

### EDJ\_MIC

#### Dual Function Controller EDJ\_MIC

Controller with **integrated sensor power supply and self-optimisation** Input: 2 x 0 ... 20 mA

---

### TFR 2

#### Compact Microprocessor Controller TFR2

for humidity, temperature and pressure  
for sensors with resistance, current, and  
voltage output.

---

### MSR000

#### Power Supply Module MSR000

24V DC voltage output and 50mA current output  
to supply the humidity sensors in the FG and FK series.

---

### MSR010

#### Multi-function Relay MSR010

with additional power supply of 24V DC  
to reinforce fine contacts, micro-switches and other contact devices  
with low breaking capacity.

---

### EDR\_MIC

#### Dual Function Controller EDR\_MIC optional with Integrated Sensor Power Supply

Dual Function controller e. g. for humidity and temperature optional  
with integrated sensor power supply inputs: 0/4 ... 20 mA, 0/0,2 ...  
1 V or Pt100 and others (see data sheet)
