

DA 40 - anemometer

The DA 40 digital anemometer gives you an accurate measure of air velocity and has been one of our most reliable instruments for over 20 years.

At the touch of a switch, this unit gives you readings in feet per minute (FPM) or meters per second (MPS), and also has a hold/reset button to freeze the display for recording readings. The DA 40 can also give you readings for average, maximum and minimum velocity.

specifications:

sensor:	vane type probe head
ranges:	probe 275: 0.2 to 40.00 MPS (40 to 7800 FPM) probe 100: 0.3 to 35.00 MPS (60 to 6800 FPM)
accuracy:	±1% of reading ±1 digit
resolution:	0.01 MPS or 1 FPM
operating temperature:	instrument: 0°C to 50°C probe heads: -30°C to +100°C
power supply:	2 pcs. 1.5V alkaline batteries
battery life:	approx. 300 hours
battery check:	automatic
dimensions:	instrument: 172 x 77 x 25mm probe 275: 70mm Ø probe 100: 25mm Ø
weight:	250g with batteries

shipment:

- 1 piece probe head (Typ 275 or Typ 100)
- 3 pieces extension rods
- 1 piece flexible rod
- 1 piece extension cable
- 2 pieces 1.5V batteries
- 1 piece carrying case

optional:
battery set
