

P5144

Differential Pressure Meter 0 ... 200 mBar with USB

The PeakTech 5144 is a measuring device that is used to determine pressure differences. It has a digital multifunction display with backlight. This high-precision measuring device enables use in installation, diagnosis, repair, maintenance and optimization of air conditioning technology, heating and ventilation systems. The USB interface and the supplied software are used to log the measured values over longer periods.

- For measuring static and pressure differences
- Measuring range of a maximum of 200 mbar
- Pressure measurement in 11 selectable units of measurement such as: bar, mbar, psi kg / cm², kpa and much more.
- Auto power-off function
- Data Hold function
- MIN, MAX, AVG recording function
- Integrated magnetic holder for hands-free operation
- USB interface and PC software
- Accessories: case, USB interface cable, 4mm and 8mm connection hoses, hose adapter, software for Windows, batteries and operating instructions
